The most obvious impact of the nation-state, as compared to its non-national predecessors, is the creation of a uniform national culture through state policy. The model of the nation-state implies that its population constitutes a nation, united by a common descent, a common language, and many forms of shared culture.

In *Man, the State, and War*, Kenneth Waltz distinguishes three levels of analysis to explain the occurrence of conflict; individual agents, nation states, and the international system (Waltz, 1959). In further redefining Realist theory in the 1970s and 1980s, the international system came to be the focal point of a Neorealist analysis of international politics.
