Plant reproduction comes in two types: sexual and asexual. Sexual reproduction is similar to human reproduction, which involves the fusion of the male (pollen) and female (ovule) gametes to form a new organism that inherits the genes of both the parents. The sexually reproductive part of a plant is the flower.

### Plant Reproduction: How Do Plants Reproduce?

Asexual Reproduction Worksheet (Reading to Learn - Asexual Reproduction Binary fission is the simplest method of reproduction. In binary fission, a parent cell splits in half and produces two new cells. During another type of asexual reproduction, an organism grows a bulge, which eventually breaks off the parent cell. This method is called budding.

### Asexual Reproduction Worksheet

Despite being one of the most important processes in nature, reproduction is still widely misunderstood by many of us. In this foundational course, you will learn about sex and reproduction by exploring the underlying biology, the most common myths, and the latest medical advances.
