The study of chemical reaction engineering (CRE) combines the study of chemical kinetics with the reactors in which the reactions occur.

Chemical kinetics and reactor design are at the heart of producing almost all industrial chemicals, such as the manufacture of phthalic anhydride shown in Figure 1-1 .

principles are clearly understood and can be applied after the completion of the book. This is achieved first through a discussion of critical thinking and how Socratic questioning is at the heart of critical thinking, followed by examples of critical thinking questions, and then finally exercises on critical thinking.
