of the respiratory system include filtering, warming, and humidifying the inhaled air. This includes the vocal cords in the larynx for sound production, lungs for control (or homeostasis) of body pH...

### (PDF) The Human Respiratory System

The two vital functions of the respiratory system are: maintenance of oxygen and carbon dioxide exchange in the lungs and tissues, and regulation of the acid base balance. Any changes in this system affect all the other body systems. In chronic respiratory disease, pulmonary changes (such as hypoxia) occur slowly, and a person's

### OUTLINE FOR RESPIRATORY SYSTEM

Respiratory System. Rrs reflects the resistance of the airways and the tissues, while Xrs is determined by the elasticity of tissues and the inertance of the central airway gas. From: Kendig's Disorders of the Respiratory Tract in Children (Ninth Edition), 2019. Download as PDF.

### Respiratory System - an overview | ScienceDirect Topics

Respiratory System Research. The respiratory system consists of the lungs, airways, diaphragm, trachea (windpipe) and pharynx (throat) and its primary function is the exchange of oxygen and carbon dioxide- breathing in and out. Between 6 and 10 liters of air are brought in and out of the lungs and 0.3 liters of oxygen are transferred from the alveoli to the blood per minute.
